Data Visualization with ggvis

Introduction

- ▶ The goal of **ggvis** is to make it easy to build **interactive graphics** for exploratory data analysis.
- ▶ ggvis has a similar underlying theory to ggplot2 (the grammar of graphics), but its expressed a little differently, and adds new features to make your plots interactive.

(Quotes from ggvis website)

Introduction

- ggvis also incorporates Shinys *reactive programming* model and dplyrs *grammar of data transformation*.
